

# Wilderness Report

*A non-profit organization dedicated to protecting wilderness values*

October 25, 2017

Mr. Merv George  
Forest Supervisor  
Six Rivers National Forest  
1330 Bayshore Way  
Eureka, CA 95501

Mr. George,

I have reviewed the management plan for the Trinity River and have been unable to locate content that addresses the use of motorized equipment within designated wild river corridors of the Trinity and its tributaries. Did I miss it?

Does the forest have a Travel Management Plan or other document that address OHV use within designated wild river corridors? If so, I would appreciate a copy of that document.

Secondly, does the River Management Plan, a Travel Management Plan or similar document address the use of drones or aircraft within designated wild river corridors? If so, I would appreciate receiving a copy of that document as well.

Lastly, does the forest have Administrative Guidelines, policies or procedures that address the use of drones within the bounds of designated wilderness? If so, a copy of these documents would be appreciated as well.

Wilderness Report is dedicated to protecting wilderness values. This subject is a matter of concern to many rivers users and information related to this matter will be posted on the Wilderness Report website.

Thank your for your assistance.

Sincerely,

Arthur Pope  
Executive Director
